PROFESSIONAL SUMMARY

Recent graduate in Computer Programming with hands-on experience in software development, backend programming, and database management. Skilled in Java and SQL with a strong interest in financial technology and wealth management solutions. Proactive and detail-oriented with a "service-first" attitude, adept at collaborating with teams to deliver high-quality solutions on tight deadlines.

SKILLS

- **Programming Languages**: Java, Python, SQL.
- **Backend Development**: API design, data integration, performance optimization
- **Database Management**: SQL, MySQL, MongoDB.
- **Tools**: Git, Docker (basic familiarity)
- **Soft Skills**: Proactive problem-solving, strong communication, independent project management

WORK EXPERIENCE

Client Services Specialist

Questrade | *January 2023 - Current*

- Supported software troubleshooting and issue resolution for trading platforms, enhancing system reliability and user satisfaction.
- Collaborated with technical teams to improve backend processes and optimize platform performance.
- Documented technical solutions for recurring issues, streamlining resolution workflows.

Human Resources Support

Canada's Wonderland | *January 2019 - April 2019*

- Assisted in managing and maintaining internal systems for employee onboarding, ensuring data integrity and process compliance.

PROJECT EXPERIENCE

Room of Chat

- Developed a real-time communication application using Angular, Node.js, and Socket.io.
- Built backend logic to handle messaging and user management, showcasing proficiency in API design and data handling.

  https://spontaneous-manatee-291ab8.netlify.app/

Xavi's Music Lounge

- Created an Angular and Node.js application integrating Spotify's public API and MongoDB.
- Designed and optimized database schema for improved performance and scalability.

  https://legendary-tartufo-7b1cd1.netlify.app/register

Portfolio

- Built a ReactJS-based portfolio site featuring dynamic content generation and client-side routing.
- Demonstrated adaptability in integrating backend APIs with frontend interfaces.
